SUMMARY

Motivated undergraduate student majoring in Mobile Application and Technology, with a strong passion for UI/UX design and Front End Development. I have successfully contributed to various university projects, enhancing my skills in creating user-friendly interfaces. Known for my adaptability and quick learning ability, I also possess strong communication skills, enabling effective collaboration in team. Eager to leverage my technical expertise and design sensibility to contribute to innovative digital solutions in a professional environment.

PROJECTS

PIRING NUSANTARA

BINUS UNIVERSITY

Developed an AR mobile application using Unity and C#, Piring Nusantara, designed to showcase Indonesian cuisine through 3D models. The app provides detailed information about the food, including its ingredients, origin, and cultural significance. Integrated augmented reality technology for an immersive user experience that allows users to explore traditional Indonesian dishes interactively.

WILLIFY

BINUS UNIVERSITY

Developed Willify, a music streaming website using HTML, CSS, and JavaScript. The platform enables users to stream, search, and discover music with a user-friendly interface. Implemented key features such as responsive design, dynamic playlists, and seamless audio playback for an engaging listening experience.

JADE SILK

BINUS UNIVERSITY

Developed Jade Silk, an Android e-commerce application using Android Studio and Kotlin. The app allows users to browse, purchase, and customize couture dresses and outfits. Integrated features such as a personalized product recommendations, and an intuitive shopping interface to enhance user engagement and satisfaction.

DISH DASH

BINUS UNIVERSITY

Developed Dish Dash, a mobile application using Flutter and Firebase that provides a digital collection of diverse food recipes. Users can browse, save, and explore various recipes with detailed instructions and ingredient lists.
